\* Adapters are available from the pinbox or rail manufacturer.

IMPORTANT: Extra bed support is recommended for 2015-2019 models of Chevy & GMC trucks with no OEM, when a gooseneck mount Ultimate Connection base is used. (Contact us for details 208.523.6460)

- 1. 2020 GM TRUCKS: the Ultimate Connection (3220 & 3220-TBX) may not provide enough clearance in 2020 Chevy & GMC trucks. ALWAYS MEASURE FOR TURNING, TAIL GATE, AND SIDE RAIL CLEARANCE.
- 2. MORryde Pin Box: This is compatible with all versions of the Ultimate ONLY when installed with MORryde Part #: RPB77-006. This part can be ordered from MORryde or from your local MORryde dealer.
- 3. The raised Ultimate Connection (3217) is recommended only for newer models of trucks (2020 and newer). Use on 2019 or older trucks may add unecessary leverage on the truck bed and excessive height.

<sup>\*\*</sup> Works with recessed ball.

<sup>\*\*\*</sup> Gusset recommended.

## **ULTIMATE CONNECTION COUPLER TUBE CHARTS**

3217, 3220, & 3220-TBX
